

### ***NEW Large Copper Pad Assembly for Magnetic Particle Inspection Machines***

- 12" x 12"
- Double-Braided Pad with V-Block.
- Replaces standard pads with no modifications needed.
- Heavy copper braid provides contact over greater surface area.

Four copper pads and v-block built with ultra-high molecular weight polyethylene, the v-block base centers and supports test parts. The pad can be reversed to provide two wear faces.

Part Number: MX1212P
